

# AR-15 BOLT SELECTION

This chart has been compiled to guide the user in selecting the correct AR-15 bolt to use for each caliber.

Frontier Tactical conducts constant testing and research to keep this reference guide current and accurate.

If you would like to add to this chart, or feel other changes need to be made, please email us directly at [info@frontiertactical.com](mailto:info@frontiertactical.com)

**NOTE** - Calibers noted with an asterisk "\*" indicate that a 7.62x39mm bolt may be used IF the chamber is a Type I chamber (this allows the 7.62x39mm bolt with a .125" bolt depth to be used). If the chamber is a Type II chamber, a 6.5mm bolt with a .136" bolt depth must be used.
